Abstract

I attended the Cooperative Education Program at Sripatum University Chonburi Campus for the first time. I have taken an interest to do internship at Preechanusas School, Chonburi because never any students went to do internship in this school from my department and I wanted to gain the knowledge and work experience from this place. I was a Teacher Assistant in elementary and pre-elementary levels in order that it could make me face problems and learn to solve them in this workplace. The problems weresuch as the students didn't pay attention while the class teachers or foreign teachers were teaching and didn't follow the order of a teacher because they wanted to talk with friends and also didn't follow courtesy with teachers regarding respecting the teachers which resulted in warning and punishment from teachers such as standing up for study for about an hour and asking about the lessons for checking that the students would understand in a lesson. These methods of solving the problems made other students have respect for the teachers and pay attention to studies had also increased. I took an interest and wanted to know the problems within the school, work as a team member, socialize with others and receive new experiences from Preechanusas School.
