Abstract

At present most of students don’t like to study English because lessons are hard to understand and in the class is full of serious activities. At Mary Immaculate Convent School, there are many classes of English but the students also study other subjects.

In the summer course there are 2 English clubs. I want to make students like to study in English class. So, I told my supervisor at school and asked her to open English for Fun Club. I consult with my supervisor about my lesson plans. I taught about vocabularies, grammar and short conversations. The lessons can be used in daily life correctly. In the class there are many games and English cartoon movies. The students like the club and want to study English. They get knowledge while having fun.
