Abstract

This report is about my private and professional experiences during my four-month Cooperative Education at Aumi Construction Co., Ltd. in Chonburi. Aumi Construction Co., Ltd. is building Construction Factory and Warehouse by designing modern building systems which are also energy saving and environment friendly and use Material quality. Aumi Company building factory and warehouse at Amata Nakorn Industrial Estate, Pinthong Industrial Estate and Hemaraj Eastern Seaboard Industrial Estates etc.

I am translator and worked for the translation department. I received document translation work from the manager and translated from Thai language into English language before sending to the boss. Most of the problems encountered in the work are the terminology about construction. Some of the words are very rare and unfamiliar, so I have to study the terminology of construction and remember it.
