Abstract

I attended the Cooperative Education Program at Sripatum University Chonburi Campus for the first time. I have taken an interest to do internship at Handle Inter Consolidation, Bangkok because never any students went to do internship at this placefrom my department and I wantedto gain the knowledge and work experience from this place. I was anoversea coordinator in order that it could make me face problemsand learn to solve them in this workplace. The problems weresuch as the foreigners could not full understand us via the mails since it is not our mother language and also with the grammatical makes the foreigner even more not understand us. There also was the problem with how we communicate using the phone. Its sound light and not clear for us and that makes it more difficult to communicate with the light signal.I have seen more problems including the vocabulary skill and speaking skill. The solution to this problem is but by other but by themselves. I assist a lot with this problem though. Sometimes they ask me to solve all of the problems above but it was a great time having the internship here.
