Abstract

I attended the Cooperative Education Training Program at Sripatum University Chonburi Campus for the first time. I took an interest to do internship at Assumption College Sriracha, Chonburi because no students from English for Business Communication from my faculty had gone to do internship at a school before, and I wanted the knowledge, work experience from this place. I was an English Teacher and a Teacher Assistant for grade 7 and primary level in order that, it could make me face problems at work such as the students didn't pay attention while the class teachers or foreign teachers were teaching and didn't follow the instructions of a teacher because they would like to talk with friends and also didn't follow courtesy with teachers regarding respecting the teachers which resulted in warning and punishment from teachers such as standing up for study for about an hour and asking about the lessons for checking that the students would understand in a lesson. These methods of solving the problems made other students have respect for the teachers and pay attention to studies had also increased. I took an interest and wanted to know the problems within the school, work as a team member, socialize with others and receive new experiences from Assumption College Sriracha.
